PROPERTY DESCRIPTION

Professional pictures are being taken on 10/10/2024. This home sits on a great private lot in the heart of Vestavia Hills. This floor plan is fabulous. The greatroom has a two story stacked stone fireplace, a wall of windows to let in so much natural light and overlook the front treelined yard. The kitchen has been updated with plenty of cabinets, counter space, granite counters, backsplash, eat in area and stainless appliances. There is a large bedroom on the main level with an updated full bathroom. Upstairs there are two additional and spacious bedrooms with an updated full bath. There is a finished area on the lower level that could be a fourth bedroom or a den. There is also a great unfinished area that will be wonderful storage. The glassed in area would be a haven for that plant person. There are two open patio areas in the back and a two car carport. This is one to put on your list.
